Freedom Paws — from the October 31 roadmap to the growth plan

Checklist dated November 8, 2026. Source of the sequence: the November 7, 2026 valuation and income plan. Status of the starting point: the October 31, 2026 launch roadmap. Click path added the same day.

This is the build. It ends in November 2027, when a shelter can be invoiced, an adopter can claim a dog that was enrolled at intake, and a membership renews on the card already on file. After that the work repeats: acquire, activate, retain, collect. A clinic seat is the only later build, and only if the year-3 profit test is met. Years 4 and 5 add no product.

Hours are founder time, one person, doing the engineering and the outreach. Waiting on the IRS, a bank, counsel, or an affiliate program is calendar time and is labeled separately. If the EIN or the bank slips, slide every later date by the same number of weeks. Do not catch up by spending the ad budget early.

Each to-do below is a heading. The numbered lines under it are the clicks, in order. The last line is the pass. The decision and the cash-register boundary are in `(11-8-26) Freedom-Paws-2026-2027-New-Launch-Roadmap.md`. This file walks the screens.

Summary

The app already has the scan, the ten protocols, the vault, the consult link, the Tennessee directory, found-dog intake, chip-number entry, and the partner pages. The October 31 roadmap was still opening the company: EIN, bank, a one-dollar charge into the LLC, then public mode, then one shelter email.

The growth plan changes that order in four ways.

- The first product to sell is an annual membership at $79 through February 28, 2027, then $99. The $18 lifetime protocol stops being the offer. A $12 monthly plan and a $29 twelve-month single-protocol pass exist so a conversation can still close.

- A payment is finished only when a second device shows the membership with no manual step. The browser flag used today does not count.
- Shelters and rescues, municipal and private, are the distribution door. The seat fee is small. The build that matters is enrolling the dog at intake and having the adopter claim that record. A hardware scanner is not part of this build.
- SuperBud is the face of five posts a week that point at the free scan. Paid video tools stay off. The photo booth stays unpublished.

Counted product work from here to the November 2027 finish is about **160 hours**, spread across the year, plus about **8 hours a week** of outreach, posts, and a look at the numbers. November 2026 itself is about **55 hours** plus the IRS and bank wait.

Already in place

- Counsel's October 26 terms, privacy, biometric consent, and diagnostics disclaimer are posted. The October 28 posting gate is cleared.
- ViT, ten protocols, vault, consult share, label scan, training week, daily log, and the hazard list are in the app.
- Freedom Paws ID enroll, found-dog intake, shelter dashboard, and chip-number scan for a logged-in user are in the app.
- Tennessee adoption directory and partner standards for insurance and telehealth are in the app.
- Stripe can open a checkout session. Xaman can take a payment. Neither writes a server entitlement.
- Affiliate, insurance, and telehealth links stay off until a partner URL exists and the bank can receive the commission.

Stop, from the October 31 roadmap

Confirm the $18 lifetime protocol is no longer the shop's ask

1. Open https://app.freedompawsinc.com and go to the token shop.
2. Read the first price a visitor sees.
3. Leave the page as it is until the November shop step below replaces that button with the annual membership.
4. Pass when you have written today's primary price in the month note, so the later step has a before-and-after.

Turn paid video production off

1. Open HeyGen, Runway, and any other paid studio account you have been using for SuperBud.
2. Cancel or pause any subscription that bills for rendered video. A phone clip does not need those accounts.
3. Leave the canon stills, the voice note, and the character bible where they are. Do not delete the master files.
4. Pass when the next invoice from those tools will be zero, and December’s first post is planned as a phone clip plus one paragraph from a protocol already written.

Hold the token-shop video and the wellness-partners video

1. Open the content list and mark the token-shop video and the wellness-partners video as held.
2. Do not render either one, and do not schedule either one.
3. Pass when both titles say they wait until a membership is the thing they point at.

Leave scanner kits unordered

1. Do not open a supplier cart and do not place a kit order.
2. If a shelter email mentions a scanner, reply that the shelter uses the reader it already owns and that the owner uses the phone they already hold.
3. Pass when no kit SKU is in a cart and the kit page still says the founder decision is pending.

Leave the closed product lines closed

1. Open the photo booth, ViT Pro, and any token or wallet screen.
2. Confirm checkout on the photo booth is unpublished, ViT Pro has no charge, and no mint button is public.
3. Leave hosted cameras as a page that teaches the owner to use their own device.
4. Pass when none of those screens can take money.

Leave research grants that call the scan a diagnosis unfiled

1. Do not open an SBIR, NIH, or similar research portal for this product.
2. If a form’s abstract would describe the scan as a diagnosis, close the form.
3. Pass when no such application is in draft.

Leave n8n off

1. Do not subscribe to n8n Cloud, and do not import workflows.
2. Plan the day-7 note and the later reorder note as mail sent through Resend.
3. Pass when n8n shows no new subscription.

Leave the 10% give-back sentence off the site

1. Open the live terms, the token shop, and the token-shop landing page.
2. Search each page for “10%” and for “give-back.”
3. Pass when the sentence is absent from all three. A spreadsheet reserve does not put it back on a page.

Weekly rhythm, from December 2026 until the build is finished

Do this block once each week. It is about 8 hours. It sits on top of the month’s project hours.

Five vendor-ledger moves, and no more

About 2.5 hours.

1. Open the ops vendor ledger.
2. Pick the next five rows that are not on hold. First rows, while they are still open, are Honest Kitchen, Pets Best, West Paw, and Vetster.
3. Do not email Open Farm, Whimzees, Ruffwear, Native Pet, Walkin’ Pets, Help ’Em Up, North Hound Life, or miNATURALS.
4. For each of the five, do one move only: send the application, log a reply, or write “no reply yet.”
5. Stop at five, even if the hour is not used up.
6. Pass when the ledger shows five dated moves and zero emails to the hold list.

Five shelter or rescue conversations

About 2.5 hours.

1. Open the shelter log.
2. Pick five organizations in Tennessee, municipal or private, that do not yet have a note this month.
3. Write each one yourself from shelter@. One organization, one note. No mail merge.

4. The ask is a conversation and a look at the adoption directory and ID enrollment. From December on, you may mention the 90-day free seat that starts in May.
5. Log the date, the name, and whether they replied.
6. Pass when five notes are in the log.

Five public posts

About 2.5 hours.

1. Pick one useful step from a protocol that is already written.
2. Record it on the phone, or write it as a caption. SuperBud may host the clip. Do not open a paid studio tool.
3. Point the post at the free scan.
4. Read the caption once for a condition name, a match rate, a reunion rate, a shop link, an affiliate link, or the 10% sentence. Remove any of those.
5. A health line tells the owner to call their own veterinarian.
6. Publish one post each weekday.
7. Pass when five posts are live and none of them diagnose.

Read ad cost, the OpenAI bill, and cash

About 30 minutes.

1. Open the ad account and write this week's spend and the number of memberships it produced.
2. Open the OpenAI usage page and write the week's charge.
3. Open the LLC bank, once it exists, and write the cash balance. Before the bank exists, write the founder cash figure you are using for the plan.
4. If last month's new members were under 70 percent of that month's target, or an ad-acquired member cost $100 or more, leave the ad budget where it is.
5. Pass when the three numbers are on the week line and the ad budget was raised only when both rules passed.

---

1. November 8–30, 2026 — the cash register

The month is done when a real card payment creates a membership that appears on a second device. No members and no ad spend are required.

The cash-register build is the price and entitlement work in this section. Founding annual is $79 through February 28, 2027. Annual is $99 and stays hidden until March 1, 2027. Monthly is $12 and is not featured. The protocol pass is $29 for twelve months. Annual and the pass are one-

time charges with an end date twelve months out. Monthly is the only subscription. The success page does not grant access. Xaman writes the same server row. Public mode, ads, live affiliate links, the shelter claim, and the photo booth stay out of the build. The live one-dollar charge waits until the LLC bank is the Stripe payout account.

File the EIN

About 1 hour. The IRS wait is often one to four weeks.

1. Open https://www.irs.gov/businesses/small-businesses-self-employed/apply-for-an-employer-identification-number-ein-online during the IRS online hours.
2. Start a new application for a limited liability company.
3. Enter the legal name Freedom Paws Wellness LLC, formed in Wyoming on September 11, 2026.
4. Enter the responsible party as Michael Kevin Corey, and use his own taxpayer identification where the form asks for the responsible party.
5. Enter the address 30 North Gould Street, Suite R, Sheridan, WY 82801, and the phone (629) 206-4430.
6. Submit the application and download the CP 575 the moment it is offered.
7. Save the CP 575 in the Legal folder. Do not send it to anyone except the bank.
8. Pass when the CP 575 is a file you can open, showing the EIN for Freedom Paws Wellness LLC.

Open the LLC bank account

About 2 hours, plus several business days of bank wait. Start this only after the CP 575 is saved.

1. Take the CP 575, the Wyoming formation receipt, the signed operating agreement, and a government photo ID to the bank you have chosen for the company.
2. Open a business checking account. The title on the account and on the checks must read Freedom Paws Wellness LLC.
3. Do not add a personal checking account as the operating account.
4. Ask the banker whether the account can receive ACH credits from an affiliate network. Write the answer in the vendor-ledger note.
5. List the founder advances already spent for the company, including the Bass fee, Wyoming fees, and tools paid from personal funds. Book each one as a reimbursement owed or as capital, and keep the list with the formation record.
6. Put the Wyoming annual-report month on the calendar.
7. Pass when you can sign into an account titled Freedom Paws Wellness LLC, the advance list is written down, and the affiliate-deposit answer is in the ledger.

Create the four Stripe prices

About 3 hours. Do this in test mode first. Repeat it in live mode only after the payout account is the LLC bank.

1. Open https://dashboard.stripe.com and confirm the account belongs to Freedom Paws Wellness LLC. If the only account is a personal one, stop and create the company account first.
2. Turn on Test mode.
3. Open Product catalog and choose Add product.
4. Create Founding Annual Membership. Set the price to $79. Choose one time, not recurring. Save, and copy the price ID.
5. Create Annual Membership at $99, one time. Copy the price ID. This price stays unused on the page until March 1, 2027.
6. Create Monthly Membership at $12. Choose recurring, billed every month. Copy the price ID.
7. Create Protocol Pass at $29, one time. Copy the price ID.
8. In the Vercel project that serves https://app.freedompawsinc.com, add the four price IDs as `STRIPE_PRICE_FOUNDING_ANNUAL`, `STRIPE_PRICE_ANNUAL`, `STRIPE_PRICE_MONTHLY`, and `STRIPE_PRICE_PASS`. Leave `STRIPE_SECRET_KEY` as it is. `STRIPE_PROTOCOL_PRICE_ID` is no longer the offer.
9. Pass when all four products are visible in test mode and the four price IDs are saved in Vercel.

Write the entitlement from a Stripe webhook

About 16 hours. This is the cash-register code. Do it on a branch. Do not set public mode in this step.

1. In the Supabase project freedom-paws-id, create an entitlements table with the account, the plan name, the status, the period end, the Stripe customer ID, the Stripe subscription ID when the plan is monthly, the protocol slug when the purchase is the pass, and the source, which is either card or Xaman.
2. In Stripe, open Developers, then Webhooks, then Add endpoint. Point it at the app's new webhook address. Subscribe to `checkout.session.completed`, `invoice.paid`, `customer.subscription.updated`, and `customer.subscription.deleted`.
3. Copy the signing secret into Vercel as `STRIPE_WEBHOOK_SECRET`.
4. Change checkout so founding annual, annual, and the pass use a one-time payment, and monthly uses a subscription. Put the signed-in account ID in the session metadata.
5. In the webhook, verify the Stripe signature. Write or update the entitlement row from that event. Set the period end twelve months out for a one-time annual charge or a pass, and use the subscription period for monthly.

6. Remove the success-page path that calls `unlockProtocol` or writes `fp-unlocked-protocols` because `stripe=1` is in the address.
7. Make the shop and the scan read the entitlement from the server. A browser flag alone must not open a protocol or a membership.
8. Deploy the branch to a preview, still in preview site mode.
9. Pass when a test payment creates a row, and visiting the success address with no webhook event leaves the account unchanged.

Prove the membership on a second device

About 3 hours. The one-dollar live charge waits until Stripe pays the LLC bank. The membership proof uses the test card until you choose a live charge.

1. In Stripe test mode, open checkout for Founding Annual as a signed-in test account.
2. Pay with the test card 4242 4242 4242 4242, any future expiration, any three-digit code, and ZIP 82801.
3. In Supabase, open the entitlements table and confirm a row for that account with plan founding annual and an end date about twelve months out.
4. Sign out. Open a second phone or a private window. Sign in with the same account. Do not copy browser storage from the first device.
5. Confirm the membership is shown and a member action is available.
6. After the LLC bank is the Stripe payout account, switch Stripe to live mode, run one $1 payment with a real card, and confirm the $1 landed in Freedom Paws Wellness LLC. Leave the $1 there.
7. Pass when the second device shows the membership with no manual step, and, once the bank is connected, the $1 is visible in the LLC account.

Give an Xaman payment the same write

About 10 hours.

1. Open the existing Xaman payment path and keep the dollar amount equal to the card price for that plan.
2. After the payload is verified as paid on the server, write the same entitlements row. Set the source to Xaman. Do not call `unlockProtocol` in the browser.
3. Pay a test payload from Xaman with the same signed-in account.
4. Refresh the entitlements table and confirm the row.
5. Open the second device, signed into that account, and confirm the membership shows.
6. Pass when a paid Xaman payload creates the row and an unpaid or unsigned return does not.

Cap the free scan and show the membership after it

About 10 hours.

1. On the ViT page, require an account before a run starts. Email sign-in is enough.
2. Count ViT runs and label scans on the server, by account and by month.
3. For an account with no entitlement, allow one ViT run, then stop. After the result, show the founding annual membership, with the pass as the side door.
4. For an account with an active membership, allow eight ViT runs and eight label scans in the current month, then stop until the next month.
5. Sign in as a new free account, run ViT once, and confirm the second run is refused.
6. Sign in as the test member from the card proof and confirm the ninth ViT run of the month is refused.
7. Pass when both caps hold after a refresh, on a second device, with no change to browser storage.

Point the public photo path at the upload that worked

About 6 hours.

1. On a phone, open the ViT photo step.
2. Use the dashed box that reads the file in the browser. Confirm the photo appears and the scan can run.
3. Confirm the gold Direct Upload box and the backup page at `/vit-upload.html` are not the path a public visitor is sent to. On October 31 those two completed an upload and then could not load the photo.
4. Change the public invite so the dashed in-browser box is the path it offers.
5. Repeat the phone check on the preview: choose a photo in the dashed box, see the preview, and reach a result.
6. Pass when an iPhone can finish a scan without Direct Upload and without `/vit-upload.html`.

Make the annual membership the shop offer

About 6 hours.

1. Open the token shop.
2. Put Founding Annual at $79 in the first position, with the date it ends: February 28, 2027.
3. Put the $29 protocol pass behind it, labeled as one protocol for twelve months.
4. Put Monthly at $12 where a visitor can find it, and do not feature it.
5. Do not show the $99 annual button. That button appears on March 1, 2027.

6. Remove $18 lifetime from the primary button. Leave old browser flags in place for people who already paid, and do not sell a new $18 lifetime from this page.
7. Read the page once for a diagnosis claim, a reunion rate, and the 10% sentence. Remove any that appear.
8. Pass when a new visitor's first price is $79 for the year, and $18 is not the button in front of them.

Place the commission disclosure on every future partner page

About 3 hours. Do not turn a partner link on in this step.

1. Open `lib/wellness/product-qualification.ts` and copy the sentence stored as `MEMBER_PRODUCT_DISCLOSURE`.
2. The sentence to place is: "Freedom Paws may earn a commission if you use a partner link. The partner sells the product or provides the coverage or the consult. Freedom Paws does not. This is not veterinary treatment. Ask your own veterinarian about your dog."
3. Put that sentence on every protocol page, partner page, and shop block that will later hold a partner link. Place it where the link will sit, even while the link itself stays off.
4. Search the public pages for a live affiliate URL. Remove any you find.
5. Pass when the sentence is visible on those pages and no partner URL is live.

Ask counsel to read two checkout sentences

About 1 hour to send. Counsel's review is their clock. Do not rewrite the posted terms beyond these two sentences.

1. Draft only these two sentences: the annual plan may be refunded within 14 days, and the membership is education and tools.
2. Email them to Bass, Berry & Sims, to the lawyers already on the Tennessee-pilot file. Ask whether those two sentences can appear on the checkout page.
3. Do not change `/terms` or `/privacy` while you wait.
4. Save the reply next to the October 26 return.
5. Pass when the email is sent and, later, when their answer is filed. Show the sentences on checkout only if they say the sentences can be shown.

Request two insurance quotes

About 2 hours. Buy nothing this month.

1. Write a one-page description: Freedom Paws Wellness LLC, a dog-owner education app, selling a membership and educational protocols, not a clinic, not a diagnosis, and not a device.

2. Send that page to two brokers and ask each for a quote on technology errors and omissions and on professional liability.
3. Save both quotes. Do not bind a policy and do not pay a premium.
4. Pass when two written quotes are in the Legal folder. Binding is the February step.

Send the RippleX invitation and ask about Aquarium

About 2 hours, plus 30 minutes for the Aquarium question. Count $0 until money is in the bank.

1. Open the developer-funding directory at https://xrpl.org/community/developer-funding.
2. From that directory, open the RippleX grants page and the invitation or application form it links to.
3. Attach a short demo of membership checkout, including the Xaman payment, and a one-page note. The milestone in the note is server entitlements and on-ledger settlement of the same dollar price.
4. Submit the form. File the confirmation.
5. Open the XRPL Commons site, find the Aquarium cohort page, and send one question asking when the next cohort opens.
6. Pass when the RippleX confirmation is saved and the Aquarium question is sent. Do not enter either amount in the forecast.

Keep paid video off for December

Same-day decision. The clicks are in the Stop section above.

1. Write December’s first five post topics, each one a step from a protocol already written, each one closing on the free scan.
2. Pass when those five topics are on the December list and no studio render is scheduled.

November build time: about 55 hours, plus IRS, bank, and counsel waits.

2. December 2026 — first cash

Ads of $350 stay locked until five real memberships have cleared. If they have not, December is the organic line only, and January picks up the same ads.

Turn founding checkout on in public

About 3 hours. Do this only after the one-dollar charge is in the LLC and the second-device test has passed.

1. Open the Vercel project for https://app.freedompawsinc.com.

2. Set `NEXT_PUBLIC_SITE_MODE` to `public`.
3. Redeploy production and wait until the deployment is Ready.
4. Open the site in a private window. Confirm the “Private preview — not indexed” banner is gone.
5. Open https://freedompawsinc.com in Framer’s editor. Click every button. Before checkout is the destination, each button must land on a free job: watch, share, the free scan, or enroll.
6. After the membership checkout is live, you may point one button at founding annual. Leave every affiliate button off. Leave the 10% sentence off.
7. On an iPhone, open the free scan and walk six taps from the first screen to a result, using the dashed in-browser photo box.
8. Pass when a stranger can open the public site, start a free scan, and reach founding checkout at $79.

Post once each weekday

About 30 minutes a post. These hours sit inside the weekly rhythm.

1. Follow the five-post steps in the weekly rhythm.
2. Pass when the week’s fifth post is live.

Write to 30 Tennessee shelters and rescues

About 8 hours across the month.

1. Make a list of 30 Tennessee organizations, municipal shelters and private rescues both.
2. From shelter@, write each one yourself. Ask for a conversation and a look at the adoption directory and ID enrollment. Mention the 90-day free seat that starts in May.
3. Send a few each week until the list is done. Do not use a mail merge and do not use n8n.
4. Log the date and the name for each note.
5. Pass when the log has 30 sent notes.

Keep the five vendor moves a week

1. Follow the vendor steps in the weekly rhythm.
2. While the first applications are still open, use the moves on Honest Kitchen, Pets Best, West Paw, and Vetster before you go further down the list.
3. Pass when each week of December shows five ledger moves.

3. January 2027 — links that have actually been approved

Follow up on quiet affiliate applications

About 2 hours.

1. Open the vendor ledger and list every application with no reply.
2. Send one short follow-up from partners@ to each of those programs. Do not send a second follow-up in the same month.
3. Log the date.
4. Pass when every quiet application has one January follow-up, or a reply, on its row.

Place a tracked link the week it is approved

About 1 hour per program. Skip this if the bank cannot receive the commission.

1. Confirm three things on that brand’s row: a tracking URL, the bank answer that says commissions can be deposited, and the disclosure sentence already on the destination page.
2. Paste the tracking URL on the one protocol that brand matches. Do not paste it on a second page.
3. Read the page. The disclosure sentence must be visible next to the link.
4. Click the link yourself and confirm it lands on the partner and carries the tracking code.
5. Pass when that one page has one tracked link, the disclosure, and a deposit path. A program you cannot track stays off the page.

Send the day-7 note

About 4 hours to set the template, then a few minutes per member.

1. In Resend, create one template. The body is one care step from the protocol that member uses.
2. Add a partner link only when that protocol has a live, disclosed link that is honestly relevant to the step. Otherwise send the care step with no link.
3. Schedule the note for seven days after the membership or the pass is paid.
4. Send it to yourself first and read it for a diagnosis claim.
5. Turn it on for new payers.
6. Pass when a test payer receives the note on day 7 and the note matches the protocol they bought.

Ask ten early buyers for one sentence

About 2 hours.

1. From the entitlements table, list the first buyers.
2. Email ten of them. Ask for one sentence about the membership, and ask whether you may show their first name with it.
3. File a sentence only when the reply includes permission.
4. Pass when ten asks are sent, and any sentence you keep has a yes attached.

4. February 2027 — founding price ends, insurance starts

Tell people the founding price ends

About 2 hours. Do this in the last week of February.

1. Export two lists: accounts that have run the free scan, and accounts with a founding annual entitlement.
2. Email both lists. Say the founding price of $79 ends on February 28, 2027, and that the annual price on March 1 is $99.
3. Do not offer a new discount.
4. Send a test to yourself first.
5. Pass when both lists have been sent and the end date is in the message.

Bind the insurance policy

About 2 hours, plus the insurer’s clock. The plan carries $200 a month from this month.

1. Open the two quotes saved in November.
2. Choose one. Confirm it covers technology errors and omissions and professional liability for Freedom Paws Wellness LLC.
3. Pay the premium from the LLC bank.
4. Save the binder and the policy PDF in the Legal folder.
5. If both quotes are refused, save the refusals in writing and leave the premium at zero until a carrier will write it.
6. Pass when the policy is bound, or both refusals are filed.

Raise ads only if the rule passes

About 2 hours.

1. Count memberships sold in December and January. If the total is under 15, leave ads at $350 or at zero if five memberships have not cleared, and stop this task.
2. Divide ad spend by the memberships that came from ads. If that cost is $100 or more, leave the budget where it is.
3. If both tests pass, raise the monthly ad budget from $350 to $700.
4. Open each ad set. Any set that has spent $150 and has not produced a member under $120 gets turned off.
5. Pass when the budget matches the rule and every failing ad set is off.

Open paperwork for the first shelter pilot

About 4 hours.

1. Choose one Tennessee organization, municipal or rescue, that answered the December notes.
2. Write a one-page pilot: $0 for 90 days, aimed at a May 2027 start, enrollment of dogs at intake, and no scanner kit.
3. Send it from shelter@. Do not send an invoice.
4. Log the agreed start month, or the refusal.
5. Pass when one organization has a May start written down, or the refusal is logged and the next organization is chosen.

5. March 2027 — one annual price

Retire founding checkout

About 2 hours. Do this on March 1.

1. Open the shop.
2. Remove the $79 founding button.
3. Show Annual at $99 as the only annual plan. Leave Monthly at $12 unfeatured and leave the $29 pass as the side door.
4. Start a test checkout and confirm the amount due is $99.
5. Confirm an old founding entitlement still opens the membership until its own end date.
6. Pass when a new buyer cannot check out at $79.

Reconcile affiliate clicks and deposits

About 30 minutes a week.

1. Each week, open the affiliate network for every live program.

2. Write the clicks and the dollars deposited to the LLC bank.
3. If a program cannot show clicks or deposits, remove its link from the protocol page that week.
4. Pass when the week line has clicks, dollars, and no link left for a program that cannot report.

6. April 2027 — read the first 90 days, add no feature

Start the monthly bookkeeping close

About 3 hours the first time, then about 2 hours a month.

1. Export the month’s Stripe payments, refunds, and fees.
2. Export the LLC bank activity for the same month.
3. Match each Stripe payout to a bank deposit.
4. Write revenue, refunds, Stripe fees, the OpenAI bill, ad spend, insurance, and the ending cash balance.
5. Save the close with the month’s name.
6. Pass when March is closed on one page and April has a repeating reminder.

Read the first 90 days of selling

About 3 hours.

1. From December 1 through March 31, write members added, members active, refunds, ad cost per member, and the OpenAI cost.
2. From the pass purchases, write which protocol was bought most often.
3. Write the one number that missed its plan.
4. Pass when that note is saved and the missed number is named.

Put the next shelter dates on a calendar

About 1 hour.

1. Open the shelter log.
2. For the first pilot, confirm the May start.
3. Add placeholder weeks for a second pilot in June and a third in August.
4. Pass when those three dates are on the calendar.

Add no feature

1. Open the product list for April.

2. Write “no feature” as the only product line for the month.
3. Do not open a build branch for a new module.
4. Pass when the month ends with no new product shipped.

7. May 2027 — first shelter pilot and the intake handoff

This is the build that makes a shelter worth using on every dog that comes in. The dog is enrolled at intake. At adoption, the new owner claims that record and lands on the free scan with the shelter’s name attached. The scanner they already own can supply a chip number. A Freedom Paws hardware kit is not required.

Go live with the first pilot on the tools that already exist

About 6 hours with the shelter.

1. Sit with the shelter, in person or on a call, and sign in to the shelter dashboard.
2. Enroll one test dog with the tools already on the page: the enroll form, the list, and a found-dog photo.
3. If they have a chip number from the reader they already own, type that number into the existing chip field. Do not ask the phone to read the chip.
4. Have a second person find that dog on the shelter list.
5. Leave the hardware-kit page out of the training.
6. Pass when the shelter can enroll a test dog and see it on their list without a new feature.

Build the intake-to-adopter claim

About 24 hours.

1. Add a shelter action that creates a dog before any owner account exists. Store the shelter’s name and, when they have it, the chip number they type.
2. On adoption, generate a claim link for that dog.
3. The adopter opens the link, creates an account or signs in, and the dog attaches to that account.
4. The adopter’s first screen is the free scan, and the shelter’s name is on that screen.
5. Run it once with a test dog and a test adopter account that did not exist when the dog was created.
6. Pass when the test adopter claims the dog and the free scan shows the shelter’s name.

Build the $20 referral credit

About 12 hours. It turns on in June.

1. Let a member create a personal referral code.
2. When a new member pays, and the code was used, credit the inviting member $20 and take $20 off the new member's price.
3. If the program is used heavily, cap credits at $20 per member until you raise the cap on purpose.
4. Do not turn the control on for the public this month.
5. Pass when two test accounts show the credit in the data and the public switch is still off.

8. June 2027 — referrals on, second pilot

Turn the referral credit on

About 2 hours.

1. Pick two real accounts you control.
2. Pay a test membership with the first account's code and confirm the $20 credit and the $20 discount.
3. Turn the public control on.
4. Pass when a real pair of accounts shows the credit and a member can see their code.

Open a second shelter pilot

About 6 hours.

1. Choose a second Tennessee organization, municipal or rescue, different from the May pilot.
2. Repeat the May onboarding: enroll, list, found-dog photo, typed chip number, no kit.
3. Show them the claim step from the May build.
4. Log the start date.
5. Pass when the second organization has enrolled a test dog and can see it.

9. July 2027 — the reorder note

Ship the care-reminder email

About 16 hours.

1. In the app, find members who logged a food or a supplement.
2. In Resend, write a reorder note on a cadence that matches that log. Include a partner link only when that link is already live and the disclosure is on the page it opens.
3. Send the test to yourself.

4. Turn it on for members who have a log entry.
5. Leave n8n off.
6. Pass when one test member with a food or supplement log receives the note, and the note contains a partner link only where the disclosure is real.

If the note slips, cut the affiliate forecast

1. On the last day of July, check whether the reorder note has been sent to a real member.
2. If it has not, mark the affiliate line for the rest of the year at the downside rate until the note is live.
3. Pass when either the note is live or the downside rate is written on the forecast.

10. August 2027 — aim the posts

Open a third pilot shelter

About 6 hours.

1. Choose a third Tennessee organization.
2. Repeat the onboarding used in May and June.
3. Log the start date.
4. Pass when the third organization has a test dog on its list.

Point posts and ads at the two protocols that sell

About 3 hours.

1. From pass purchases and from membership signups, list the protocols people actually use.
2. Pick the top two.
3. For the next month, write posts and ad tests only from those two. Leave the other eight in the library for members.
4. Pass when the next four posts name one of those two protocols.

11. September 2027 — the paid seat and the renewal note

Draft the paid shelter agreement

About 4 hours, plus counsel if you want a review.

1. Write a short agreement: $69 a month, starting the day that organization’s 90-day pilot ends, for the intake enrollment and the adopter claim.

2. Say the pilot is extended once, and not invoiced, if it produced zero owner signups.
3. If you want counsel to read it, send only this draft to Bass, Berry & Sims, and wait for their clock.
4. Do not send it to a shelter until you are willing to invoice in November.
5. Pass when the draft is saved, and counsel's reply is filed if you asked for one.

Draft the renewal email

About 3 hours of copy. The billing build is the October block.

1. Write one email for the December 2026 cohort. It goes out 30 days before the year is up.
2. The offer is renewal at $99. Do not add a new discount.
3. Include a line that they can renew in one click and a line that they can cancel.
4. Save the copy. Do not send it this month.
5. Pass when the copy is filed for use in November.

12. October 2027 — close year 1 on paper

Compare the year with the plan

About 3 hours.

1. Count active members. The plan's figure is 316.
2. Add affiliate deposits for the year. The plan's figure is about $2,100.
3. Divide ad spend by ad-acquired members. The plan's range is $70 to $85.
4. Write the difference for each number, and name the largest miss.
5. Pass when the one-page comparison is saved.

Move the first shelter onto the paid seat, or extend it once

About 2 hours.

1. Count owner signups that came from the first pilot.
2. If there was a handful or more, sign that organization onto the $69 seat for November, using the September agreement.
3. If there were zero owner signups, extend the free pilot once and do not send an invoice.
4. Pass when the organization is either signed for November or extended in writing.

Finish renewal billing

About 16 hours. First use is November.

1. For each annual entitlement, store the customer and the payment method so a later charge does not ask for the card again.
2. Thirty days before the period end, send the September renewal email.
3. On the end date, charge the card already on file for $99 and write a new period end twelve months out.
4. Send a receipt.
5. Offer a one-click cancel that stops the next charge and leaves access in place until the current period end.
6. Run the sequence on one test entitlement whose end date you set to tomorrow.
7. Pass when that test account is charged, receipted, and able to cancel, without a new card number being typed.

13. November 2027 — the build is complete

Invoice the first shelter at $69

About 3 hours.

1. In Stripe, create a $69 monthly invoice for the organization that signed in October.
2. Send it to the address on the agreement.
3. Leave two or three other organizations on a free pilot so the next paid seats have a pipeline.
4. Pass when the $69 invoice is sent and the free pilots are still listed as free.

Confirm the claim on one real adoption

About 2 hours.

1. Ask the paid shelter to use the claim link on one real adoption.
2. Sit with the result. The new owner’s account should hold the dog, and the free scan should show that shelter’s name.
3. If the claim fails, fix that path before you invoice a second shelter.
4. Pass when one real adopter has claimed the dog and the shelter name is visible.

Confirm the December renewal schedule

About 1 hour.

1. Open the entitlements that expire in December 2026’s cohort window.
2. Confirm each one has a renewal email dated 30 days prior and a charge dated on the period end.
3. Pass when every December renewal is scheduled.

Product work for the growth plan ends here. About 160 hours from November 8, 2026.

14. December 2027 through April 2028 — run the machine, then one hire

These months are operating time, about 8 hours a week, plus the items below. No new product.

Renew the first cohort personally

About 3 hours. December 2027.

1. Open the December renewal list from the November schedule.
2. Write to anyone whose charge fails or who does not renew. The list is still small enough to write one by one.
3. Divide renewed accounts by accounts that were due. If that rate is under 45 percent, freeze any ad increase until you have written the reason.
4. Pass when every failed or silent renewal has a personal note, and the rate is written down.

Move shelters to $69 as their pilots end

About 6 hours per shelter. January and February 2028.

1. For each pilot whose 90 days have ended, count owner signups.
2. If there were signups, sign the $69 agreement and invoice. If there were none, extend once and do not invoice.
3. The plan’s paid-organization count is 2, then 2, then 3 in March, then 4 in April. Treat those counts as targets, and write the actual count beside them.
4. Pass when each ended pilot is either invoiced or extended, and the count is written down.

Take the draw only if the rule passes

February 2028.

1. Read operating profit for the last two closed months. Both must be above $5,000.
2. Read cash. It must be above $10,000.
3. If both are true, transfer $3,000 from the LLC bank to yourself and label it as the founder draw.
4. If either test fails, transfer nothing.
5. Pass when the transfer matches the rule, including a transfer of zero.

Write the contractor description

About 2 hours. March 2028. Do not hire in this step unless the April rule is already met early.

1. Write a one-page description with three duties: reply to member email within one business day, onboard a shelter from this checklist, and send the reminder sequence.
2. Write what you keep: ads, partner relationships, and what the scan is allowed to say.
3. Save the page. Do not post it and do not pay anyone.
4. Pass when the page is filed.

Hire only if the April rule passes

April 2028. This is also the last month of the hard $1,500 cap.

1. Confirm the founder draw has already started.
2. Confirm operating profit is above $8,000 and cash is above $20,000.
3. If all three are true, hire one contractor at $2,200 a month and hand them the inbox and the shelter checklist.
4. If any one is false, do not hire. Keep doing the inbox and the shelter onboarding yourself.
5. Pass when the hire matches the rule, including no hire.

15. After the build — only if the test is passed

Read ten transcripts a week

About 1 hour a week, May through July 2028.

1. Each week, open ten scan transcripts.
2. Mark any sentence that names a condition as if the scan had diagnosed it.
3. Tighten the prompt that week for every sentence you marked.
4. Pass when the week’s ten are read and any marked sentence has a prompt change in the same week.

Write the November 2028 shelter price

About 2 hours, August through October 2028.

1. Write the price for new shelter agreements that start in November 2028: $99 a month.
2. Write that an existing $69 agreement steps up to $99 when that agreement renews, not before.
3. The October 2028 target is nine paid shelters. Write the actual count beside it.

4. Pass when the new price, the step-up rule, and the actual count are on one page.

Keep the renewal note and the handoff as the work

November 2028 through April 2029.

1. Each month, confirm the 30-day renewal note went out to the accounts that are due.
2. Each month, confirm the shelter-to-owner claim was used on the adoptions those shelters reported.
3. Open no new product line in this window.
4. Pass when the month note says the renewal mail went out, the claim was checked, and no new product started.

Write the clinic offer only after the profit test

May through October 2029. About 4 hours to write. About 20 hours to build, and only after the conversations.

1. Read operating profit for the last three closed months. All three must be above $20,000. If one is not, stop this task.
2. Write a one-page offer: the consult packet the product already creates, plus a shared link, at $49 a month. Leave ViT Pro out of the offer.
3. Show that page to five clinics.
4. Build the billing for it only if those five say they would pay.
5. Pass when the offer is either unbuilt because the test failed, or written and shown to five clinics, with a build started only after they said they would pay.

Standing rules

These are the rules the steps above already carry. Check them at each month’s close.

1. From the November membership launch, a free scan requires an email account and stops after one run.
2. A member gets eight ViT runs and eight label scans a month, counted on the server.
3. Card and Xaman are the same dollar price, and either one is a row on the server.
4. A partner link stays off until the bank can receive the commission and the disclosure sentence is on that page.
5. Ads stay at or under $100 per ad-acquired member. Through April 2028, tools, legal, insurance, bookkeeping, and ads together stay at or under $1,500. The OpenAI bill and card fees sit outside that cap.
6. A scanner product, photo-booth checkout, token minting, and a diagnosis claim stay out.
