Freedom Paws Wellness LLC

Master Business Plan

November 2026 through October 2030

Document title: Master Business Plan, 2026–2030

Date: November 8, 2026

Entity: Freedom Paws Wellness LLC, a Wyoming limited liability company formed September 11, 2026

Managing member: the founder. One person does the work until the contractor rule in this plan is met.

Horizon: forty-eight months, November 2026 through October 2030. A fifth year, through October 2031, is shown as an outer reading and is not a new strategy.

Status: This is the business bible. It supersedes every prior business plan, financial model, launch roadmap, timeline, and growth memo in this repository for operating, pricing, hiring, and valuation decisions. Those files remain as history. Do not follow them when they conflict with this document.

Execution extract: `(11-8-26) Freedom-Paws-2026-2027-New-Launch-Roadmap.md` is the checklist for the first fourteen months. If that file and this plan ever disagree, this plan wins and the roadmap is corrected the same week.

Not a promise. Figures are the planning case of a model with stated assumptions. They are not an appraisal, a solvency opinion, tax advice, or veterinary advice. Bass, Berry & Sims did not guarantee sufficiency and did not give governmental approval.

---

1. How to run the company from this document

Update this file when a measurement replaces an assumption. The order of measurements is renewal rate, ad cost per member, affiliate dollars per member, and members per shelter.

Everything else in the overhead can be wrong by a hundred dollars and the story will still hold.

Three results live in the model.

- The **planning case** is the path the task list is built to hit.
- The **downside** cuts new members in half, cuts the affiliate rate in half, and starts paid shelters six months late.
- A **weak-renewal** view keeps demand and cuts annual renewal from 60 percent to 45 percent.

Dollars in the monthly tables are the model's own arithmetic, rounded to the nearest dollar. Valuation figures are rounded to the nearest thousand after the starting date. Grants are not in the forecast. A grant that arrives is added to cash in the month it arrives.

Starting operating cash is assumed at $5,000 on November 7, 2026. A different balance shifts every cash figure and every equity figure by the same amount. Operating profit does not change. Formation fees and counsel already paid are sunk.

---

2. The company

Freedom Paws Wellness LLC sells education, owner tools, and disclosed referrals to adults in the United States who keep dogs. It is not a veterinary clinic. The scan is not a diagnosis. The protocols are not treatment. The audience is 18 and over. That ceiling stays in force on every revenue line, every ad, and every grant application.

Posted legal set, live since October 28, 2026.

Item	What is live
Terms	October 26, 2026. “Last updated October 26, 2026.”
Privacy	Effective date set by the founder to October 28, 2026. Counsel’s file said October 26.
Phone	(629) 206-4430
Address	30 North Gould Street, Suite R, Sheridan, WY 82801
Arbitration and class-action waiver	Removed
Jury waiver	Kept
Biometric consent	Version 2026-10-14
Diagnostics disclaimer	October 14, 2026
10% give-back	Off the terms and off the shop. It stays off.

Counsel’s word on the Tennessee-pilot posting gate is **final**. It is not “approved.” Selling, public mode, and the shop wait for the founder’s notice that the EIN is open and the bank account is open. On November 8, 2026 that notice has not been given. The EIN responsible party on the prior roadmap is Michael Kevin Corey.

Production application: https://app.freedompawsinc.com, still in preview mode. Marketing site: https://freedompawsinc.com.

---

3. Verdict

On November 8, 2026 the company is pre-revenue. There is no waitlist counted in this plan, no signed affiliate contract, and no paying user. The planning value is **$80,000**: $75,000 for a focused replacement of the owner-facing product that already works, plus $5,000 of starting cash. A range of $50,000 to $150,000 is defensible. A multi-million figure is not, until recurring revenue exists.

The asset that can become a multi-million-dollar company is the owner record — identification, vault, gait, and the consult packet — sold as an annual membership, with affiliate commissions on food and coverage the company already knows how to qualify, and a small shelter seat that feeds new owners into the free scan. The $18 lifetime protocol, the photo booth, token minting, and a hardware scanner do not carry the valuation.

In the planning case:

- First cash is December 2026.

- Cash operating profit, with the founder unpaid, starts the same month.
- Economic profit, after a $6,000 monthly charge for founder labor, starts in year 2.
- Equity crosses $1 million at month 30, April 2029.
- At month 36, October 2029, equity is about **$1,626,000**. About $1,273,000 is the operating business. About $354,000 is cash.
- At month 48, October 2030, equity is about **$3,104,000**. About $2,246,000 is the operating business. About $858,000 is cash.
- At month 60, October 2031, the same method reads about **$4,962,000**. That year is outside the detailed operating horizon of this bible.

The downside reaches about $1,069,000 of equity at month 48 and does not run out of the starting cash. That is the case to survive. The planning case is the case to execute.

---

4. Mission and the commercial boundary

The product’s promise is practical. An owner sees the dog’s picture, reads the sources, and takes the steps an owner can take: food, treats, chews, and supplements chosen against a private standard, the matching protocol, and a licensed veterinarian when the situation is beyond that. Identification sits beside the wellness work so a lost dog has a path home.

Wellness education is easy to postpone. Lost-dog identification and the first week after adoption are not. The income plan uses those urgent moments as the front door and the protocol library as the reason to stay a second year.

Trust is the commercial asset. A membership people renew, and a food commission they do not resent, both depend on the company remaining obviously on the owner’s side. The disclaimers already on the scan and the protocols are doing commercial work.

A shelter enrolls the dog at intake, while the dog is still a stray or a surrender and there is no owner account. At adoption, the new owner claims that record and lands on the free scan with the shelter’s name attached. That claim is the acquisition event. A chip scan does not create an owner. Most municipal shelters already own a reader. Phones cannot read an implanted chip. This plan does not buy, stock, or sell scanner hardware. Municipal shelters and private rescues are both in scope. Tennessee is first because the directory and the found-dog queue are already built. Later seats are any U.S. organization that will run the handoff.

---

5. The offer

These are planning prices. They are not the prices live in the application on November 8, 2026. The live shop still shows $18 lifetime per protocol. That offer is retired before any advertisement

runs.

Offer	Price	Who it is for	When it turns on
Free scan	$0, one time, email required	Every new owner	November 2026, before any ad
Founding membership	$79 per year	Buyers through February 28, 2027	December 2026
Membership	$99 per year	The standard offer	March 1, 2027
Monthly membership	$12 per month	People who will not prepay. Offered, not featured.	December 2026
Protocol pass	$29 for 12 months of one protocol	People who refuse the membership	December 2026
Shelter seat, pilot	$0 for 90 days	Tennessee rescues and shelters, municipal and private	First pilot May 2027
Shelter seat	$69 per month, then $99 for new agreements from November 2028	Organizations that finish the pilot	First paid seat November 2027

The membership includes all ten protocols, the vault, the consult packet, the training week, the daily log, care reminders, and a monthly allowance of eight ViT runs and eight label scans. The free user gets one ViT run. That cap is the profit protection on the OpenAI bill.

Push annual at checkout. If ten buyers in a month take monthly instead of annual, that month’s cash is lower by about $87 per buyer and the next eleven months each pick up $12. A 14-day refund on the annual plan should be checked with counsel before it is shown. Refunds are not in the math. A 5 percent refund rate would shave about 5 percent off membership cash.

Card and Xaman are the same dollar price. The entitlement is a row on the server either way. The company does not lead with a token. The checkout does not mint one.

Why these prices

$99 a year is $8.25 a month, collected once. The $12 monthly price is the comparison that makes $99 the obvious choice: $144 if paid monthly, $99 if paid annually. The founding $79 ends. Founding members renew at $99. The 60 percent renewal assumption already includes some of them declining the step-up.

$29 for a single protocol sits above the old $18 and below $99. The model sells about 0.35 passes for every new member. Those buyers are not members and they do not renew.

$69 a month is a decision a shelter manager can make without a capital campaign. $99 a month is the price once the handoff to new owners is visibly working. Twenty shelters at $99 is about $24,000 a year. That will not be the headline revenue. The headline is the owners those shelters send.

Unit economics of one member

A member who pays $99 and renews at 60 percent has an expected paid life of 30 months. Expected membership cash is about $248. Card fees take roughly $8 across the life. Scan and label cost in the model is about $0.18 a month, about $5 across the life. Affiliate contribution is modeled as an average across the whole base, including members who never click, of roughly $2.50 a month early and up to $4.75 a month at maturity, about $75 over the life at the early average. Net value of a member is on the order of $310 before the cost of finding them.

Ads are priced to buy a member at $85 in the early months, $70 through month 18, and $60 after that. A member bought at $85 against a value near $310 is a profitable purchase on day one, because the $99 arrives immediately. The limit in year 1 is the $1,500 cap, and the rule that a bad ad set gets turned off.

One bound insurance policy, at the company's own target of roughly $40 to $120, is worth more than several $18 protocol sales. That is a unit fact. It is not a claim that affiliates dominate year 1. No carrier has agreed to the target. Telehealth referral fees in the company's own standards are roughly $15 to $35 per completed consult. Both sit inside the per-member affiliate average. They are not stacked on top of it.

---

6. What is built, and what this plan does with each module

The build is ahead of the business. The constraint is the cash register, not another screen.

Module	What exists on November 8, 2026	Decision in this plan
ViT scan	Live. Photo, short video, symptom match. Urgent banner uses counsel's language. OpenAI vision defaults to gpt-4o-mini.	Front door. One free run, then membership. Eight runs a month for members. Never described as a diagnosis.
Ten protocols	Live and public. Shop price in code is $18, or 25 XRP when a live rate is missing.	Included in the membership. $18 lifetime is retired as the main offer. The $29 pass is the side door.
Entitlements	A browser flag. A card return can set it from the success URL. No webhook writes a server row.	November 2026. Nothing else in this plan is safe to scale without it. Xaman uses the same write.
Vault, gait, consult link	Live, including a time-limited veterinarian link. A one-time SQL check for vault media is written in the launch roadmap and is not on the critical path.	Included in membership. The record is what makes renewal rational.
Label scan, training week, daily log, hazards	Live. Label scan calls OpenAI.	Included. Label scan is inside the eight-a-month member cap.
Freedom Paws ID	Enroll, biometric consent, found-dog intake, shelter dashboard, and chip-number entry for a logged-in user. Kit page is a placeholder.	Included for members. Shelters use it at intake. No hardware product.
Shelter listings	Tennessee adoption directory and a partner portal.	Distribution. Free 90-day pilot, then $69, then $99 for new agreements.
Intake-to-adopter claim	Not built. Found-dog intake matches dogs that are already enrolled. A stray has no owner account.	May 2027. This is the feature that lets a shelter use the product on every dog that comes in.
Affiliate catalog	Built and dark. Brands are listed. Links stay off until a URL exists and the bank can receive the money.	Turn on one program at a time, December 2026 through April 2027, as each approval clears the bank test.

Insurance and telehealth standards	Written in the product. No signed partner. Targets are the company's own, not a contract.	Applications start in November and December because approval takes weeks.
Care email and reorder note	Not built.	Day-7 note in January 2027. Reorder note in July 2027, through Resend.
Referral credit	Not built.	$20 for the member and $20 off for the new member. Built in May, on in June 2027.
Renewal billing	Not built.	Armed in November 2027. First cohort is December 2027, at $99.
Shelter invoice	Not built.	$69 from November 2027.
Photo booth	Packs priced at $2.99, $6.99, and $14.99. Purchase path says coming soon. Costume calls a paid image model.	Leave the packs unpublished. Backgrounds and accessories can stay free.
Monitor guide	A page for a camera the owner already owns.	Keep. Do not host video.
Xaman / XRPL	A second way to pay. No token is minted for the buyer.	Keep the rail at the same dollar price. Do not lead with it. Do not mint in order to chase a grant.
ViT Pro	An allow-listed advisor shell, marked as foundation work.	No budget in the first 18 months. It is not the clinic seat.
Clinic seat	The consult packet already exists.	A one-page offer at $49 a month, shown to five clinics only if operating profit has stayed above $20,000 for three straight months in the May–October 2029 window. Build it only if those five say they would pay. It is not in the financial tables.
Ops studio and SuperBud	Internal desk and a character pipeline are further along than the cash register.	SuperBud may host five posts a week that point at the free scan. Paid studio tools stay off. SuperBud is not a revenue line.
Token shop copy about dynamic NFTs	On the protocol pages.	Educational access is the product. The copy must not outrun the entitlement, which is a server row.

Explicitly out of the build

Through at least April 2028, and longer where noted:

- A paid ViT Pro product, a veterinary advisor retainer, and any screen that reads as a clinical decision tool.
- Photo-booth checkout.
- On-chain token minting.
- A hardware identification kit and any inventory.
- Hosted cameras.
- A hired production studio, a second full-time employee, and any ad budget that skips the $100 cost rule.
- A data-licensing business built on biometric records. The records exist to serve the owner and to get a dog home.
- Any sentence, in the product or in an ad, that says the scan diagnosed a condition or that a protocol treats one.
- A nonprofit formed so this LLC can apply to Petco Love, PetSmart Charities, or Maddie's Fund.

---

7. Rules that override the calendar

Ads. Through April 2028, tools, legal, insurance, bookkeeping, and ads together stay at or under $1,500 a month. Variable OpenAI and card fees sit outside that cap. Raise ads to the next step only when the prior month hit at least 70 percent of its new-member target and an ad-acquired member cost under $100. If the rule fails, repeat the month and hold the prior budget. From May 2028, ads may rise to 20 percent of the prior month's operating profit and may not exceed $3,000, and only while ad-acquired members still cost under $100.

Founder pay. Operating profit treats the founder's labor as unpaid. That is the right view for whether the company can pay its bills. Economic profit charges $6,000 a month, $72,000 a year, for that labor. The $3,000 owner draw is a cash distribution once the company can spare it. It is not a second salary on top of the $6,000. The draw rule is two consecutive months of operating profit above $5,000, and cash above $10,000. In the planning case that is February 2028. If the month misses, the founder takes nothing. The company does not borrow to pay the founder. The draw stays at $3,000. It does not rise with profit.

Contractor. $2,200 a month for shelter onboarding and member email, only after the draw has started, operating profit is above $8,000, and cash is above $20,000. In the planning case that is April 2028. The job is not a second product builder. The founder keeps ads, partner relationships, and what the scan is allowed to say.

Weekly rhythm, from December 2026. Five vendor-ledger moves. Five shelter or rescue conversations. Five posts from protocols already written. A look at ad cost, the OpenAI bill, and cash. About eight hours. Brands on hold stay off email: Open Farm, Whimzees, Ruffwear, Native Pet, Walkin' Pets, Help 'Em Up, North Hound Life, and miNATURALS.

Slip rule. If the EIN or the bank slips, slide every later date by the same number of weeks. Do not catch up with ads.

---

8. Where a new member comes from

Each source has a ceiling. The new-member line is the sum of four sources.

- **Organic.** Posts, search, and direct conversations. A handful in December 2026, capped near 70 a month late in the plan. One founder and one contractor do not become a media company. SuperBud is the face of these posts, not a separate engine.
- **Ads.** A few hundred dollars buys a handful of members at $70 to $85. Later, up to $3,000 buys about 50 at $60. The plan does not assume a cheaper result.
- **Shelters.** A free pilot is worth about one new member a month. A paid shelter is worth about two. A shelter that sends ten a month is upside, not the booked plan. The May 2027 intake claim is what makes a higher number possible. Book it when the first pilot measures it.
- **Referrals.** About half of one percent of active members per month at first, rising toward about 1.2 percent. The $20 credit exists to make this small rate plausible.

At month 12 the planning split is 28 organic, 12 from ads, 4 from shelters, and 1 from referrals: 45 new members. At month 36 the split is 58 organic, 50 from ads, 50 from shelters, and 29 referrals: 187 new members, on a base of 2,614. At month 48 the base is 4,105 active members and 34 paid shelters.

---

9. Overhead

Variable cost is OpenAI plus card fees. It moves with use and sits outside the $1,500 cap. Overhead is everything else the company pays to stay open and to buy attention. The founder is not in overhead.

Line	Month 1	Months 2–3	Months 4–6	Months 7–18
Hosting, database, email, domain	$90	$90	$90	$160
Legal spend	$0	$200	$200	$200
Liability insurance	$0	$0	$200 from February 2027	$200
Bookkeeping	$0	$0	$75 from April 2027	$75
Ads	$0	$350	$700	$865
Discretionary total	$90	$640	about $1,190 to $1,265	$1,500

From May 2028 the hard cap comes off ads only, inside the 20 percent and $3,000 rules. Insurance steps from $200 to $300 in May 2028 and to $450 in November 2029. Legal steps down to $150 once the first wave of agreements is done. Hosting steps from $160 toward $280, then higher, because gait video and consult files are the storage that will actually cost money. If storage runs ahead of that schedule, raise the tools line and cut ads before cutting insurance.

Card fees are 2.9 percent plus 30 cents. OpenAI in the model is about 4.5 cents a scan and about 18 cents a member-month inside the allowance. Gross margin in the planning case is about 95 to 96 percent in every year. It breaks if scan caps come off or the company starts shipping goods.

---

10. Financial goals

Years run November through October. Year 1 is November 2026 through October 2027. Operating profit does not subtract the owner draw. Economic profit subtracts $72,000 and does not also subtract the draw. Ending equity is rounded to the nearest thousand. Ending cash is the model balance.

Annual planning case, through the 48-month horizon

Year	Ending	Active members	Revenue	Operating profit	Economic profit	Owner draw	Ending cash	Ending equity
1	Oct 2027	316	$35,696	$20,129	−$51,871	$0	$25,129	$118,000
2	Oct 2028	1,136	$148,155	$101,131	$29,131	$27,000	$99,260	$549,000
3	Oct 2029	2,614	$378,067	$290,615	$218,615	$36,000	$353,875	$1,626,000
4	Oct 2030	4,105	$640,666	$539,928	$467,928	$36,000	$857,803	$3,104,000

Year 5, November 2030 through October 2031, is the outer reading and uses the same machine: 5,535 active members, $905,605 of revenue, $793,807 of operating profit, $721,807 of economic profit, cash of $1,615,610, and equity of about $4,962,000. No new product is required for that reading. It is not a separate strategy.

Revenue mix

Year	Membership	Passes	Affiliate	Shelter fees	Total
1	$30,404	$3,219	$2,073	$0	$35,696
2	$112,464	$9,599	$22,435	$3,657	$148,155
3	$258,786	$19,604	$80,570	$19,107	$378,067
4	$406,395	$25,781	$174,632	$33,858	$640,666

Membership, including renewals, is the majority in every year. That is what makes a revenue multiple defensible. Affiliate becomes a serious second line by year 3 and is valued at one times trailing revenue, because a merchant can end the program. Shelter fees stay a single-digit share. If a future year shows shelters as the growth story and membership flat, rerun the valuation before believing the equity number.

Member and income goals, year 1, month by month

Month	New	Active	Revenue	Operating profit	Cash at end
Nov 2026	0	0	$0	−$90	$4,910
Dec 2026	10	10	$906	$228	$5,138
Jan 2027	14	24	$1,251	$557	$5,695
Feb 2027	20	44	$1,783	$514	$6,209
Mar 2027	22	66	$2,460	$1,166	$7,375
Apr 2027	24	90	$2,676	$1,296	$8,671
May 2027	29	119	$3,250	$1,609	$10,280
Jun 2027	32	151	$3,600	$1,941	$12,221
Jul 2027	36	187	$4,268	$2,585	$14,806
Aug 2027	41	228	$4,864	$3,154	$17,960
Sep 2027	43	271	$5,166	$3,440	$21,400
Oct 2027	45	316	$5,472	$3,729	$25,129

Year 2 goals

Month	New	Renew	Active	Paid shelters	Revenue	Operating profit	Draw	Cash
Nov 2027	52	0	368	1	$6,383	$4,600	$0	$29,729
Dec 2027	54	6	418	1	$7,292	$5,472	$0	$35,200
Jan 2028	57	8	469	2	$8,443	$6,593	$0	$41,793
Feb 2028	60	12	521	2	$9,308	$7,423	$3,000	$46,217
Mar 2028	64	13	576	3	$10,052	$8,136	$3,000	$51,353
Apr 2028	68	14	634	4	$10,834	$6,685	$3,000	$55,037
May 2028	81	17	703	5	$12,792	$7,850	$3,000	$59,887
Jun 2028	88	19	778	5	$13,976	$8,752	$3,000	$65,639
Jul 2028	95	22	859	6	$15,316	$9,856	$3,000	$72,495
Aug 2028	102	25	945	7	$16,699	$10,960	$3,000	$80,455
Sep 2028	109	26	1,037	8	$17,871	$11,861	$3,000	$89,316
Oct 2028	117	27	1,136	9	$19,190	$12,944	$3,000	$99,260

April’s operating profit steps down because the contractor starts, if the rule is met.

Year 3 goals

Month	New	Renew	Active	Paid shelters	Revenue	Operating profit	Cash
Nov 2028	129	31	1,244	10	$22,489	$15,934	$112,194
Dec 2028	141	36	1,361	11	$24,796	$17,740	$126,934
Jan 2029	145	39	1,480	12	$26,063	$18,955	$142,889
Feb 2029	149	43	1,600	13	$27,403	$20,242	$160,131
Mar 2029	154	46	1,723	14	$28,782	$21,566	$178,697
Apr 2029	160	49	1,850	16	$30,374	$23,094	$198,790
May 2029	165	59	1,976	17	$32,457	$25,098	$220,888
Jun 2029	169	64	2,102	18	$33,917	$26,500	$244,389
Jul 2029	174	70	2,229	19	$35,608	$28,125	$269,514
Aug 2029	178	76	2,356	20	$37,170	$29,626	$296,140
Sep 2029	183	81	2,485	21	$38,768	$31,161	$324,301
Oct 2029	187	86	2,614	22	$40,239	$32,574	$353,875

The owner draw is $3,000 in each of these months. Shelter price for new agreements is $99 from November 2028. Existing $69 agreements step up at renewal, not mid-term. Overhead flattens near $3,880 once ads sit on the $3,000 ceiling (tools $280, legal $150, insurance $300, bookkeeping $150, ads $3,000), and insurance steps up again in November 2029.

Year 4 goals, the close of the 48-month horizon

Month	New	Renew	Active	Paid shelters	Revenue	Operating profit	Cash
Nov 2029	191	96	2,741	23	$44,282	$36,222	$387,097
Dec 2029	194	106	2,864	24	$46,220	$38,090	$422,187
Jan 2030	198	110	2,988	25	$47,667	$39,483	$458,670
Feb 2030	202	115	3,113	26	$49,246	$41,004	$496,674
Mar 2030	205	120	3,238	27	$50,698	$42,401	$536,075
Apr 2030	210	126	3,365	28	$52,483	$44,121	$577,196
May 2030	213	134	3,488	29	$54,223	$45,797	$619,993
Jun 2030	217	140	3,612	30	$55,868	$47,382	$664,375
Jul 2030	221	146	3,735	31	$57,509	$48,962	$710,337
Aug 2030	225	153	3,859	32	$59,282	$50,670	$758,008
Sep 2030	228	159	3,982	33	$60,824	$52,155	$807,163
Oct 2030	232	164	4,105	34	$62,365	$53,640	$857,803

The draw remains $3,000. One new shelter a month. Ads stay at the $3,000 cap. Organic acquisition stays near 60 to 70 a month. No second product is required.

Valuation every six months

Planning value is equity: operating value plus cash, or a code floor plus cash when that floor is higher. Membership annualized revenue is the active paid year, at the price those members actually pay. Founding members still inside their first year count at $79. Shelter annualized revenue is the org count times the price then in force times twelve. Affiliate value is trailing twelve months, at a multiple of 1. Membership multiples step from 2.5 at month 6 to 4.5 at month 48. Shelter multiples are 3 under five paying organizations, 4.5 under fifteen, and 6 after that. The multiple steps up because a risk has had time to retire, not because the calendar turned.

An owner-earnings check takes the next twelve months of operating profit, subtracts $72,000, and divides by a high rate with no growth credit: 50 percent through month 12, 40 percent through month 30, and 30 percent through month 48. The planning value remains the equity column. At October 2027 the multiple values the business at about $93,000 and the earnings check values it at about $58,000. A buyer who had to hire a replacement on day one would use

the lower figure plus cash. From April 2028 forward the earnings check sits near or above the multiple.

Date	Active members	Operating value	Cash	Planning equity	Downside equity
Nov 2026	—	$75,000	$5,000	$80,000	$80,000
Apr 2027	90	$20,000	$9,000	$59,000	$54,000
Oct 2027	316	$93,000	$25,000	$118,000	$50,000
Apr 2028	634	$208,000	$55,000	$263,000	$106,000
Oct 2028	1,136	$450,000	$99,000	$549,000	$206,000
Apr 2029	1,850	$802,000	$199,000	$1,001,000	$341,000
Oct 2029	2,614	$1,273,000	$354,000	$1,626,000	$569,000
Apr 2030	3,365	$1,658,000	$577,000	$2,235,000	$767,000
Oct 2030	4,105	$2,246,000	$858,000	$3,104,000	$1,069,000

Month 6 equity sits near $59,000, below the day-one figure, because a code floor of $50,000 plus cash is higher than the thin revenue math, and the floor itself is lower than the starting replacement cost. Revenue has not yet caught the code. By month 12, in the planning case, it has.

If renewal is 45 percent instead of 60, year 1 is untouched. Month-36 equity falls from about $1,626,000 to about $1,504,000. Month-60 equity falls from about $4,962,000 to about $4,202,000. The December 2027 cohort is the measurement that decides which column to believe. Under 45 percent, ad increases stop until the reason is known.

If the price stays at $18 for life, with the same ads, year-1 revenue is about $4,400 and the starting $5,000 is gone. With ads turned off, year-1 revenue is near $3,500, the loss shrinks, and there is still no recurring revenue to multiply. That is why the price changes before the ad budget does.

---

11. Direction for the forty-eight months

Hours below are founder time unless the contractor is named. The launch roadmap holds the week-by-week boxes for November 2026 through November 2027. This section is the management view: what the period is for, what done looks like, and what to refuse.

Months 1–2. November–December 2026. Open the register.

File the EIN (about 1 hour, then the IRS wait). Open the bank in the LLC's name (about 2 hours, then the bank's wait). Build the webhook, the four prices, the one-scan cap, and the Xaman write (about 45 hours). Ask counsel about two checkout sentences (about 1 hour to send). Quote insurance (about 2 hours). Send the RippleX form and count $0 (about 2 hours). In December, turn public mode and founding checkout on only after the second-device test, write to 30 Tennessee shelters and rescues (about 8 hours), and keep ads locked until five memberships have cleared.

Refuse: ads before five sales, the $18 button as the offer, paid video, scanner orders, and any grant that calls the scan a diagnosis.

Months 3–6. January–April 2027. Make the price real.

Place affiliate links only as each program clears the bank (about 1 hour each). Send the day-7 care note (about 4 hours to set up). End the founding price on February 28 (about 2 hours). Bind insurance (about 2 hours). Raise ads to $700 only inside the cost rule. On March 1, $99 is the only annual plan (about 2 hours). In April, start the monthly close (about 3 hours to set up) and add no feature.

Done when: 90 active members is the planning target, and the 90-day note names the number that missed. A miss does not get an ad increase.

Months 7–12. May–October 2027. The owner engine and the first shelters.

Build the intake claim (about 24 hours) and the referral credit (about 12 hours). Open three pilots, about 6 hours each. Ship the reorder email in July (about 16 hours). In September, draft the $69 agreement (about 4 hours) and the renewal note (about 3 hours). In October, write year 1 down against 316 members and about $2,100 of affiliate deposits (about 3 hours), and finish renewal billing (about 16 hours).

Insight. A shelter that enrolls every incoming dog and never gets an adopter to claim the record has not acquired a member. The claim screen, the shelter's name on it, and a human who shows the adopter how to finish are the product. The scanner is not. If the first pilot produces zero owner signups, extend it once and do not invoice.

Year-1 reading. Operating profit near $20,000 is a successful year. Economic profit near −$52,000 means the founder is still the unpaid workforce. Do not hire. Do not read the cash profit as a salary.

Months 13–18. November 2027–April 2028. Charge for the seat, then one hire.

Invoice the first shelter at $69 in November (about 3 hours). In December, renew the original ten personally (about 3 hours). The model keeps 6. If the real rate is under 45 percent, freeze ad increases. Move later pilots onto $69 as they end, about 6 hours of onboarding each. Paid-org count in the plan: 1, then 1, then 2, then 2, then 3, then 4. Take the $3,000 draw in February only if the rule is met. Write the contractor description in March (about 2 hours). Hire in April only if the rule is met. Hand them the inbox and the shelter checklist. This is the last month of the hard $1,500 cap.

Refuse: a new product line, a second full-time employee, and a draw funded by a new owner contribution.

Months 19–24. May–October 2028. Let the renewal base compound.

The contractor runs onboarding and the reminder inbox. Ads float under the 20 percent rule with a $3,000 ceiling. Once a week, read ten scan transcripts against the disclaimer and tighten the prompt the same week if anything sounds like a diagnosis. About 1 hour a week. Nine paid shelters is the October target. Write the $99 price for new shelter agreements (about 2 hours). Existing $69 agreements step up when they renew. If renewal on the spring cohorts has held near 60 percent, year 3 stands. If it has not, switch internal targets to the downside column and keep the price.

Planning target at October 2028: 1,136 active members, about $19,190 of revenue that month, cash near $99,260, equity about $549,000.

Months 25–36. November 2028–October 2029. Cross a million dollars of equity without a new product.

The work that makes these months true is the 30-day renewal note and the quality of the shelter-to-owner handoff. Equity in the planning case crosses $1 million in April 2029, at about $1,001,000, on 1,850 active members. October 2029 ends at 2,614 members, 22 paid shelters, monthly revenue near $40,239, and equity near $1,626,000.

From May through October 2029, if operating profit has been above $20,000 for three straight months, write a one-page clinic offer at $49 a month for the consult packet the product already creates (about 4 hours). Show it to five clinics. Build it, about 20 hours, only if those five say they would pay. ViT Pro stays outside that offer.

Refuse: opening a diagnostic product, a hardware line, or a studio in the window where renewal and the handoff are the whole job.

Months 37–48. November 2029–October 2030. The same machine, larger.

One new shelter a month, toward 34 paid organizations by October 2030. Ads remain at the $3,000 cap while cost per member stays under $100. Organic acquisition stays near 60 to 70 a month. The draw stays $3,000. The contractor stays on onboarding and email. The founder still owns the disclaimer, the partner relationships, and the ads.

Planning target at October 2030: 4,105 active members, year revenue of $640,666, operating profit of $539,928, cash of $857,803, equity of about $3,104,000.

An optional lever, not in the numbers: each November, if renewal has held at 60 percent or better, raise the annual price by $10 for new members only. Existing members renew once at the price they were promised, then move to the new price.

What "done" means at month 48. The company is a membership business with a second, smaller shelter line and an affiliate line that is real and not owned. It is not a clinic, not a store, and not a media company. If those three sentences are still true and the four measurements are written down every year, the plan has been followed.

---

12. Grants

Counted in this plan: **$0.** The amount worth preparing for, if one real award lands, is about **$15,000 to $60,000** over two years. That covers the monthly cap for about a year, or the contractor for about 7 to 27 months. It does not fund a full-time hire or a second product. Adding every published ceiling produces a figure above $600,000. That stack is not a forecast.

Grant cash may count toward the $20,000 cash test. It does not waive the operating-profit test. Spend an award on the server entitlement, insurance, and the cost of putting a shelter on the product.

Source	What to do	Counted
xrpl.org developer-funding page	A directory. It points to RippleX, the university program, and XRPL Commons. It does not write checks.	$0
Ripple, through RippleX	Invitation form in November 2026. Published grants run $10,000 to $200,000 and are aimed at payments, DeFi, and tokenization. A pet app is off that list. Upside, if invited, $10,000 to $50,000, tied to server entitlements and on-ledger settlement of the same membership price.	$0 until received
Ripple Impact	Financial inclusion and emerging-market work. Not this product.	$0
University Blockchain Research Initiative	Universities and students. A company cannot apply.	$0
XRPL Commons	Aquarium is an incubator with no promised cash. Glow pays individual open-source developers, not the company. Make Waves 2026 closed September 21, 2026.	$0
Google, AWS, Microsoft, OpenAI credits	Credits are not cash and do not pay the OpenAI bill on this stack. OpenAI startup credits require a venture referral this plan does not take.	$0
Wyoming Kickstart	$5,000 to $50,000 when open, and paused as of November 8, 2026. Extra founder tests apply.	$0 while paused
Wyoming Market Expansion	A small cost match, only with a real Wyoming operation. A filing address alone may not qualify. Confirm on the state’s page before counting a dollar.	$0 until confirmed
Petco Love, PetSmart Charities, Maddie’s Fund	Shelters and nonprofits apply. After the first paid seat, ask that shelter whether software is an allowed line on a grant they already know how to win. The company invoices only against a written budget.	$0 until invoiced

Checked November 8, 2026 against the funders’ own pages and the November 7 grant note in the valuation plan. Confirm each program again before applying. Programs close and reopen.

---

13. Risks and the response

Risk	What it does to the plan	Response
EIN or bank slips	Every later date moves.	Slide the calendar. Do not spend ads to “catch up.”
Second-device entitlement is late	Ads would buy a customer the company cannot recognize.	No public selling and no ads until the test passes.
Renewal under 45% in December 2027	The base does not compound. Equity at month 60 falls toward about $4.2 million in the weak-renewal case, and the near-term damage is wasted ad spend.	Freeze ad increases. Fix the product or the copy before buying more of it.
Ad cost per member over $100	The purchase is no longer obviously paid for by the first year’s fee.	Turn the extra dollar off. Repeat the month at the prior budget.
Affiliate programs pay poorly or not at all	Year-1 affiliate in the plan is only about $2,100. The membership still stands.	Use the downside affiliate rate. Do not invent a commission.
A shelter pilot produces no owners	The seat fee would be charging for a door that does not open.	Extend once. Do not invoice.
Scan copy drifts into diagnosis	Partners, insurers, and counsel are reading the same sentences.	Weekly transcript review from May 2028, and the same standard before that whenever a sentence is questionable.
Founder is the only operator and cash is pulled out	The multiple stays at 3.5 or below no matter what the calendar says.	The draw stays $3,000. Retained cash is part of the equity on purpose.
Hardware, booth, or studio spend starts	Gross margin and the cap both break.	Those lines stay closed.

---

14. How this bible is updated

Once a quarter, and in the month of the first renewal (December 2027), replace the four measurements with the actuals and note the date at the top of this file. Do not keep a second plan “for the old model.” History stays in the dated files this document supersedes, including:

- the October 31, 2026 Launch Roadmap

- the October 23, 2026 master business plan and roadmap
- earlier five-year models, timelines, and agent growth memos in `docs/`

The November 7, 2026 valuation and income plan is the arithmetic source for the figures in this bible. This bible is the document to operate from and to revise. The launch roadmap is the checklist for the first fourteen months.

A change to price, to the ad rule, to the draw, or to what the scan is allowed to say is a change to this file first, then to the product. The product does not get a new offer that this file has not named.

---

15. Closing standard

The company is worth about $80,000 today because the product works and the customer does not yet exist. It is worth more later only if owners pay every year, the company can show where the next owner came from, and the scan remains an education and records product. The work that produces that outcome is already listed. The work that does not produce it is already named and left closed.

Prepared November 8, 2026. Horizon of the operating plan: November 2026 through October 2030. Review the four measurements at the first renewal, in December 2027, and reset the column if the measurements disagree with the plan.
